

Project no. 340-044

Demonstration of and instruction in use of fixtures with LED light sources

Project manager: Danish Lighting Center – Kenneth Munck
– Tel.: +45 4717 1800

A mobile LED laboratory is to assist in reporting and demonstrating the results of project 339-040, with quality assessment of LED fixtures. The laboratory is to be used to train designers, architects, engineers, utility companies and fitters, and concurrently support initiatives for market characteristics.

Project status:

This project is being prepared. Training posters and demonstration units are under construction.

Anticipated final project results:

The project shall assist with building up knowledge on LEDs and energy savings at Danish educational institutions, the utility companies, energy advisors and designers and fixture manufacturers.
